

Ingram Micro Joins Growing List of Channel Partners to Distribute the CRI Thermal Mirror Temperature Screening Solution with Cloud-based AI Platform

August 5, 2020

LOUISVILLE, Ky., Aug. 5, 2020 /PRNewswire/ -- [Creative Realities, Inc.](#) ("Creative Realities," "CRI," or the "Company") (NASDAQ: CREX, CREXW), a leading provider of digital marketing solutions, today announced that [Ingram Micro Inc.](#) will distribute the CRI Thermal Mirror. With more than 190 logistics centers worldwide, Ingram Micro serves more than 200,000 customers in roughly 160 countries around the globe.

"As businesses throughout the world grapple with the challenge of operating against the backdrop of COVID-19, we see increasing demand for solutions that protect the well-being of employees and customers, while ensuring businesses comply with local, state and federal health regulations," said Craig Birmingham, Vice President and General Manager, Business and Consumer Solutions at Ingram Micro. "A leader in thermal screening, CRI offers a solution that's ready for easy deployment, and able to scale quickly for use across even the largest enterprises."

As businesses confront the many health and safety issues surrounding the return to work, selecting an effective thermal screening solution is critical for safely welcoming employees and customers back. The market for these solutions is increasingly crowded, underscoring the importance of a trusted partner like Ingram Micro to help businesses make smart purchasing decisions.

The CRI Thermal Mirror offers a superior value proposition compared to standard off-the-shelf offerings in that it is flexible enough to serve basic temperature-screening needs, while its customer experience and reporting capabilities can be customized to suit specific needs of virtually any business customer. The solution's centralized, AI-enabled software platform supports an extensive range of workflows and requirements, and scales easily for mass deployment.

"Temperature screening is a key component of any return-to-work plan, and our solution is ideal not just for monitoring temperature, but for aggregating and capturing these important data points to ensure businesses comply with relevant health regulations," said Rick Mills, Chief Executive Officer of CRI. "We're pleased that Ingram Micro chose to add the CRI Thermal Mirror to its portfolio of solutions. Together we offer a solution that's ready to scale quickly to help businesses re-open for business in a way that safeguards employees and customers alike."
